

Ryan Dey

Richardson, TX — hello@ryandey.xyz | linkedin.com/in/ryanpdey | ryandey.xyz

EXPERIENCE

Florida Blue

May 2023 – Present

Associate IT Developer

Remote

- Conceptualize and deliver production React.js solutions for data ingest platforms.
- Integrate PostgreSQL and MongoDB databases with React.js/Next.js apps using Express.js and REST APIs.
- Collaborate with project leads and UX engineers for rapid web app prototyping.
- Develop and maintain documentation for data ingest platforms to support new team members and external users.

Radiata Web

Apr. 2023 – Present

Freelance Full-Stack Web Developer

Remote

- Guide clients through the web development process to design and develop a bespoke web solution tailored to their business' needs.
- Build optimized and accessible web apps with JavaScript, React.js, Next.js, PostgreSQL, and MongoDB.
- Migrate client sites from a local environment to a cloud-hosted solution via AWS.

University of North Florida

Feb. 2022 – May 2023

Webmaster

Jacksonville, FL

- Executed the migration of 50+ web pages across three departments to a modern CMS solution.
- Redeveloped every page to utilize semantic HTML and verify that they passed ADA accessibility requirements.
- Integrated MongoDB/PostgreSQL databases and a corporate SSO API to serve role-based content to users.

University of North Florida

Jul. 2021 – Feb. 2022

IT Technician

Jacksonville, FL

- Designed marketing materials for campus events, faculty initiatives, and video projects.
- Wrote Python scripts to automate document generation and equipment rentals, driving a more efficient process.
- Flashed operating systems and configured Active Directory on UNF devices across campus.

Savage Labs

Apr. 2019 – Jul. 2021

Frontend Engineer

Remote

- Worked with backend engineers and leadership to build a proprietary software marketplace with React.js/Next.js.
- Managed the implementation process, built wireframes/prototypes with Figma, deployed with Vercel, and automated the CI/CD production environment.
- Successfully launched, garnering 150+ registered users and nearly 6000 unique downloads.

EDUCATION

University of North Florida

Bachelor of Science in Information Systems, Minor in Business Administration

- Developed a full-stack customer-relationship management (CRM) application with MongoDB, Express.js, React.js, and Node.js for the League of Women Voters of Florida non-profit. See projects section below for more details.
